Periods compared: 25/6期 vs 26/6期 (PB ratio and SKU trend also show 27/6期, 2 months)

Generated 2026-10-02 08:43 | Source: 開発方向性 コミュニケーション資料2.xlsx

Scope: all 60 sub-category rows, incl. 3 categories from the category sheet (観賞魚, 鳥, 昆虫).

1. Key takeaways

- PB sales moved ¥4.70B → ¥5.13B (¥428M, +9.1%) and the PB ratio 18.4% → 19.1% (+0.76 pt). 猫ウェット contributed ¥345M, about 81% of the net change.
- Of that growth, ¥178M (42%) came from market growth at last year's PB shares and ¥251M (58%) from net share change (gains ¥562M, losses -¥312M).
- The PB ratio change of +0.76 pt splits into +0.98 pt from share change inside sub-categories and -0.22 pt from the sales mix shifting between sub-categories.
- Volume view: PB units +23.6% vs non-PB units -5.3%; total units -0.3% while sales +4.8%, so market sales growth reflects price/mix.
- PB SKUs went 336 → 567 (+69%) while PB sales moved +9%; sales per PB SKU ¥14.0M → ¥9.0M (-35%); each added SKU brought ¥1.9M of extra PB sales on average. The PB SKU count in 27/6 is 518.
- PB sales are concentrated: the top 3 sub-categories (犬トイレタリー / 犬シート, 猫トイレタリー / 猫砂, 猫ウェット / 缶) are 62% of PB sales and 7 sub-categories make up 80%.
- Largest non-PB pools with little or no PB position: 猫ドライ / グルメ (¥2.09B non-PB, PB 1.3%); 猫スナック / レトルト (¥1.96B non-PB, PB 2.4%); 猫ドライ / 機能食 (¥1.32B non-PB, PB 0.0%).

2. What drove PB growth

PB sales changed by ¥428M. Holding each sub-category's 25/6期 PB share fixed, market growth alone would have added ¥178M; the rest, ¥251M, is net share change. The two parts add up exactly.

PB sales bridge, 25/6期 → 26/6期

PB ratio 18.37% → 19.12% (+0.76 pt) = +0.98 pt from share change inside sub-categories and -0.22 pt from mix (sales shifting between higher-PB and lower-PB sub-categories).

Concentration: top 3 sub-categories = 62% of PB sales (62% in 25/6期); top 5 = 74%; 7 of 33 PB-active sub-categories make up 80% (HHI 0.145).

3. Where PB sales moved, and where the headroom is

Change in PB sales, 25/6期 → 26/6期 (largest movers)

Largest non-PB sales pools, 26/6期

4. Category scorecard: growth, ranking and SKU vs sales

Rank is by PB sales (1 = largest). Verdict compares the change in PB SKU count with the change in PB sales (SKU change within $\pm 10\%$ counts as a stable range; small bases under ¥50.0M PB sales are not judged).

PB growth = change in PB sales vs the previous period. Market growth = change in total (PB + non-PB) sales. Marginal PB sales per added SKU: ¥1.9M overall vs ¥14.0M per existing SKU in 25/6期.

Sub-category	PB sales	PB share path

The 27/6 period is partial, so its share is indicative (seasonality).

6. Proposed direction (data-driven; トライアル markers not used)

Each sub-category is assigned to one direction by transparent rules (see appendix). Non-PB = total sales minus PB sales in the latest full period.

Scale (5)

PB share has been rising, PB sales are material and non-PB headroom remains. Put SKU effort here first.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
猫ウェット / レギュラーパウチ	¥2.26B	¥2.09B	2.1%→7.7%→10.3%	+11.3%
猫ウェット / 缶	¥1.43B	¥525M	47.4%→63.4%→67.1%	-3.0%

犬ウェット / 缶	¥324M	¥253M	18.9%→21.8%→24.2%	-1.1%

Replicate (5)

No real PB position yet, but a sibling sub-category in the same category is a proven Scale item. Reuse that playbook.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
犬スナック / 練り込み_成形スナック	¥972M	¥937M	3.7%→3.5%→4.1%	+2.5%

猫スナック / ジャーキー・機能スナック	¥266M	¥265M	0.0%→0.5%→0.6%	+9.4%

Recapture (2)

PB share collapsed versus the previous period. Find the root cause (delisting, competitor, pricing) before investing.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
猫スナック / レトルト	¥2.01B	¥1.96B	13.8%→2.4%→0.0%	+13.7%
犬スナック / レトルト	¥372M	¥369M	8.6%→0.6%→0.0%	+6.4%

Test small (8)

Large pools with no PB position and no proven sibling. Feasibility is not visible in this data, so test with 1-2 SKUs.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
猫ドライ / グルメ	¥2.12B	¥2.09B	1.0%→1.3%→0.0%	+4.0%

小動物 / 小動物フード	¥377M	¥365M	2.4%→3.2%→2.8%	+2.6%

Review (2)

PB share is slipping. Check whether this is a product, price or placement issue.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
犬スナック / オーラルケアガム	¥845M	¥823M	5.6%→2.6%→2.6%	+5.9%
犬猫生活用品 / つめとぎ	¥97.1M	¥70.8M	29.7%→27.1%→25.2%	+15.3%

Defend (3)

PB share is already high. Protect it and avoid adding SKUs that only dilute productivity.

Sub-category	Sales 26/6	Non-PB	PB share 25/6→26/6→27/6	Mkt YoY
猫トイレタリー / 猫砂	¥1.61B	¥525M	68.4%→67.3%→66.4%	+4.8%
犬トイレタリー / 犬シート	¥1.53B	¥319M	78.4%→79.1%→79.3%	+2.0%
季節商品 / 秋冬	¥250M	¥42.1M	77.2%→83.2%→84.1%	-0.2%

Deprioritize (17)

Small or shrinking pools with no PB position. Low priority.

鳥, 猫ウェット / ライフサポートパウチ, 犬猫生活用品 / 健康, 犬猫生活用品 / 美容, 小動物 / 小動物用品, 猫ウェット / カップ, 犬猫生活用品 / 食器, 猫ドライ / 療法食, 猫トイレタリー / 猫トイレタリー本体, 犬ドライ / 療法食, 猫トイレタリー / 猫用紙おむつ, 犬猫生活用品 / 移動用品, 犬トイレタリー / 犬トイレタリー用品, 猫ウェット / 療法食, 犬ウェット / 療法食, 犬ウェット / カップ, 猫トイレタリー / 猫トイレタリー用品

Borderline classifications

These would change direction if thresholds moved by roughly $\pm 25\%$ (headroom), ± 1 pt (share gain), $\pm 60\%$ (no-PB share) or ± 10 pt (defend share). Treat them as judgement calls: 猫ドライ / グルメ (Test small $\rightarrow$ Replicate); 猫ドライ / 機能食 (Test small $\rightarrow$ Replicate); 犬スナック / 練り込み_成形スナック (Replicate $\rightarrow$ Monitor); 小動物 / 小動物フード (Test small $\rightarrow$ Monitor); 犬ウェット / 缶 (Scale $\rightarrow$ Monitor); 犬ウェット / パウチ (Replicate $\rightarrow$ Test small).

7. Illustrative upside (assumption-based)

Scale items: PB share reaches current share plus 2 years of the last observed gain (capped at 70%). Recapture items: previous-period share is restored. Replicate items: 10% share. Test small items are excluded. These are planning assumptions, not forecasts, and assume the sales come from national brands with total sales flat.

8. Caveats to settle before the meeting

- The 27/6 period is marked as 2 months, but its sales are 24% of the 26/6 full year; 2 months would be about 17%. It may cover more months or be strongly seasonal, so confirm the period. 27/6 is used only for PB ratios and SKU counts, never for growth.
- PB share in a partial period covers a different part of the year (seasonality), so 27/6 vs 26/6 share changes are indicative, not like-for-like.
- There is no margin or cost data. Everything here is sales share, so a high PB share is not necessarily high profit.
- Average price per unit mixes price changes, pack-size changes and product mix. Volume vs price statements are indicative only.
- SKUs added during the year have not had a full year of sales, so sales per SKU understates their steady-state productivity. If 「PB SKU数」 counts only SKUs that sold in the period, the dilution finding is also somewhat overstated.

9. Data checks and reconciliation

- Categories with no sub-category rows were taken from the category sheet and included in all totals: 観賞魚, 鳥, 昆虫 (¥685M of 26/6期 sales). Their detail is category-level only.
- Reconciliation: computed sales and PB ratios match the source's department totals for all 6 scopes and 3 periods.
- 4 sub-categories lost more than half of their sales year on year (e.g. 猫ドライ / 療法食 -69%, 犬ドライ / 療法食 -70%, 猫ウェット / 療法食 -99%): small bases or discontinued ranges. Growth percentages there are not meaningful.

Method notes

- PB sales = total sales x PB ratio (sales basis); non-PB sales = total - PB. PB units = total units x PB ratio (units basis).
- Growth bridge: change in PB sales = (sales change x prior PB share) + (current sales x PB share change), summed over sub-categories. Exact, no residual.
- PB ratio bridge: share effect = average sales weight x share change; mix effect = average PB share x change in sales weight. Exact, no residual.
- Extra PB sales per added SKU = change in PB sales / change in PB SKU count, only where SKUs increased.
